# A.T.O.<sup>®</sup> Stoppers

The new 'Air Test Only' Stoppers eliminate the need for separate blank and test ends ...

Manufactured in the UK, A.T.O.<sup>®</sup> Stoppers have been designed for air testing only. The A.T.O.<sup>®</sup> Stopper has a number of improvements which make the operators job easier on site...

- All pipe stoppers can be used as test and blanks ends
- Totally collapsible, lightweight & easily transported
- Specially designed carry straps make the stopper easy to handle and easy to position in the pipe
- Gauge can be attached to the stopper with Velcro to allow easy reading
- Manufactured to exact pipe size, nominal bore + or - 6mm
- Inflation with A.T.O.<sup>®</sup> inflator or alternatively hand pump or compressor
- Schrader valve for inflation & pre-set, tamper proof relief valve
- On/off tap for air out vent & moulded hose-tube connector

**A.T.O.<sup>®</sup> Stoppers**  
available for  
pipe diameters  
from  
**300mm -1800mm**

Manufactured and tested to B.S.E.N 1610-1998
